Personal Statement

I am an emerging young leader with a passion for technology, web development, and creating impactful solutions that drive community progress. As a Software Engineering student and a Mastercard Foundation scholar at the African Leadership University (ALU), I am dedicated to leveraging my skills in web design and development to address critical challenges within my community in Rwanda. My journey is driven by a commitment to developing accessible and innovative tech solutions, with a particular focus on enhancing digital experiences and improving access to essential services, such as healthcare. I aspire to utilise my expertise to create and support the functionality of intuitive and efficient applications that not only bridge technological gaps but also contribute to the broader goal of sustainable socio-economic development in Rwanda.

- **Salesforce Administrator** ALX, March 2024 - Present
I am a certified Salesforce Admin as of October 14 2024.

PROFESSIONAL & VOLUNTEER EXPERIENCE

Communication Manager

June 2023 - Present

Break Into Tech Initiative- ALU Rwanda

As the Communication Manager in the Break Into Tech school club, I uphold efficient communication to support students' technology-oriented career triumphs. I identify job/internship opportunities globally and inform the students of these opportunities. I also manage the club's mentorship program, where I enlist reliable mentors to guide club members. Finally, I support the club's mission of empowering students' journey to achieving successful tech careers by connecting the club to relevant school departments to promote initiatives and secure sponsorships for planned activities, such as club Hackathons or Tech training.

Communication Intern

September 2023 – December 2023

Nasho Irrigation Cooperative (NAICO)– Kirehe, Rwanda

Funded by the Howard G. Buffett Foundation, the Nasho irrigation project includes pivot irrigation systems serving 2099 small-scale farmers and a model village of 144 houses. The cooperative was established to improve on-farm productivity by providing electricity to pump water, reducing the burden on farmers.

As a Communication intern, I leveraged digital marketing strategies to assist in improving the cooperative's visibility and updating NAICO's audience through story-writing and supervising social media presence. This boosted the cooperative's accessibility to private agricultural markets by 12%; thus, contributing to long-term cooperative sustainability and development by facilitating digital marketing.

Software Engineering Apprentice

October 2024 – January 2024

Umurava– Kigali, Rwanda

Contributed to software development initiatives focused on streamlining operational efficiency and enhancing digital solutions. Assisted in designing, testing, and deploying software features to support Umurava's mission. Engaged in debugging, documentation, and cross-functional collaboration to improve system performance. Gained hands-on experience with development workflows, API integrations, and software best practices, strengthening problem-solving skills in a real-world engineering environment.
